## CITY STATISTICS.

Awaital Assessment Report of the Sec. retary of the Water Works.

OFFICE OF WATER WORKS, Detroit, June 30th, 1855. 47-3 TO THE BOARD OF WATER COMMISSIONERS OF

THE CITY OF DETROIT. GENTLEMEN: - In conformity with section 1, of chapter 2, of the ordinances of the Board, the annual assessment of the rates to be charged for water, for the year commencing July 1st, 1855. has been made, and the following recapitulation of the same, together with various statistics collected at the same time, and comparative tables showing the increase of the number of families in the city, the increased number of families supplied with water from the Works, and the increased amount of water rates over last year, is herewith submitted. The aggregate amount of water rates assessed is \$36,184, being an increase of \$4,344 over last year. The number of assessments is 6,566, being an increase since July I, 1854, of 694. The number of families now sapplied with water from the Works is 5,282, being 663 more than there were one year ago. The total number of families in the city is 6,328, being \$75 more than there were at the same time last year. The assessment of rates was commenced en the 15th day of April last, and completed on the 17th inst. The number of dwellings vacant in the city at the time the different sections were visited was 23, being 28 less than there were at the same time last year, and several of these were vacated to repair. The number of dwellings constructing at the same time was 132, being 8 more than last year. The number of families within the city limits now unsupplied with water from the Works is 1,045, about 80 of whom obtain water directly from the river, and the rest from wells, mostly poorly supplied by surface drainage. Of these, at least 800 families are desirous of procuring water from the Works, and will do so whenever the distributing pipes

are extended accessibly to their residences .-The sections of the inhabited parts of the city most destitute of distributing pipes at present are as follows: In the Fourth Ward, in Mullett and Catharine streets; Fifth Ward, in Spencer street and vicinity of Second and Orchard

streets; Sixth Ward, in Woodward Avenue, north of the residence of Mr. McFarren .- Adams Avenue, east of St. Antoine street.-St. Antoine and Hastings streets, north of Elizabeth street. -- and Riopelle street and vicinity, north of the Gratiot road; Seventh Ward, in portions of Croghan,

Macomb, Clinton, Righ, Maple, Chestnut and Jay streets, and some others between Orleans street and the eastern line of the city; and in the Eighth Ward, between the Chicago and Grand River roads, on Seventh street and streets running into the same west of Sixth street, and

north of the Grand River road. Distributing pipes are accessible to nearly every dwelling in the other parts of the city. The assessment having been commenced before the prohibitory liquor law went into operation, the brewerless were assessed as heretofore. The aggregate amount of their assessment amounts to \$1,467. amount of their assessment amounts to \$1,467. Operations at some of these have since been suspended. Should they all be so, the assessment of water rates would be reduced the above amount. The annual assessment of water rates in 1851—which was the year before the Works came into your charge—amounted to the sum of \$19,756. The annual rate now reaches the sum of \$36,184, being an increase of \$16,428 in four years. In 1845 there were but 915 families supplied with water from the Works. That number has increased nearly six hundred per cent.in the past ten years. past ten years. 47-4
